

739± ACRES

SHASTA COUNTY, CALIFORNIA

Four large adjusted parcels • Springs & creeks • Timber & open ground • Existing well & structure • Direct BLM connection

PROPOSED PACKAGE PRICE
\$949,000

OWNER FINANCING
May be considered

Property Aerial - Parcels & BLM

Labeled aerial showing the four working parcel acreages and the two connected BLM areas.
Parcel acreage is based on the recorded 2004 engineered Property Line Adjustment.

Working deeded acreage: 739+/- acres (173 + 291 + 86 + 189). BLM land is public land and is not included in deeded acreage.
Boundaries and mapping are for marketing/reference purposes and should be independently verified.

Topography, Creeks, Parcels & BLM

Labeled topographic map showing parcel acreages, BLM areas, terrain and mapped creek corridors. The full property extent is shown without cropping the southern boundary.

Mapped features include Lack Creek and Ash Creek. BLM land is public land and is not included in deeded acreage. Contours, boundaries, water features and mapping are for reference purposes and should be independently verified.

Seller reports an existing well producing approximately 50 gallons per minute, water storage tanks, an existing structure, and a possible septic system on the 173+/- acre parcel. Structure size and condition, septic status, and well production should be independently verified.

Water & natural features: Photographs provided by Seller show areas of surface water, wet areas, and lush vegetation on the overall property offering. Creek corridors are also shown on the maps. The specific location of photographed water features, seasonal flow, and water rights have not been independently verified.

Recreation, Privacy & Public-Land Setting

Timber, oak woodland, open ground, ridges, valleys and an established internal road network create a property that may appeal to hunting, recreation, retreat, ranch and legacy-land buyers.

Public-land setting:

Seller/agent mapping indicates a 40+/- acre BLM tract completely surrounded by the larger ownership, plus approximately 80 acres of BLM adjoining the southwest side. The BLM acreage is public land and is not included in the deeded acreage being sold.

Labeled topo shows all four deeded parcels, the surrounded BLM tract and adjoining BLM land. Boundaries and public-land information should be independently verified.

Flexible Purchase Opportunities

Subject to Shasta County Planning and title confirmation, the property can be positioned as one large holding or as individual large-acreage opportunities.

Working Acreage	Positioning	Proposed Price
173± acres	Reported 50-GPM well + existing structure	\$299,000
86± acres	Wooded/timbered areas; smaller tract	\$179,000
189± acres	Large recreational tract; varied terrain	\$249,000
291± acres	Largest individual tract	\$349,000

PACKAGE OPPORTUNITY

\$949,000

Proposed asking price for the entire 739± acre holding

Owner financing may be considered, subject to seller approval, payoff requirements, down payment, creditworthiness and final terms.

Property Information & Due Diligence

Current due diligence: The recorded 2004 Property Line Adjustment depicts four adjusted parcels. Shasta County Planning confirmation of separate legal/buildable parcel status is pending. Current assessor acreage differs from the engineered PLA acreage.

Buyer to verify: exact legal acreage; parcel/buildability status; access and easements; well production and permits; septic existence/condition; structure permits, size and condition; water rights and seasonal/perennial nature of springs and creeks; timber volume/value; BLM boundaries and public access rules; zoning and permitted uses.
