- A. Locational Criteria. Development must be located on a collector or arterial, as designated in the general plan and development standards; should have a potential or existing support population of one thousand to three thousand five hundred persons.
- B. Minimum Lot Area. The minimum lot area requirement is ten thousand square feet.
- C. Maximum Lot Area. The maximum lot area restriction is one and one-half acres if the site is served by a community or package sewer system; three acres if the site is not served by a community or package sewer system.

When this exception is made, the front yard shall be at least a distance equal to the average front yard of fifty percent of the buildings farthest from the street.
